

Introducing Anti Amyloid Therapy For Early Alzheimer's Disease.

Robina Private Hospital is proud to offer groundbreaking Anti Amyloid Infusion therapies for Alzheimer's Disease with Donanemab and Lecanemab.

These medications are disease modifying therapies that target beta amyloid plaques in the brain, helping to slow the progression of cognitive decline and preserve independence for longer.

WHO IS IT FOR?

- Patients with mild cognitive impairment (MCI) or mild dementia due to Alzheimer's
- Confirmed presence of amyloid with specialised diagnostic brain imaging
- People who have had baseline assessments and diagnosis through a Memory Clinic

WHAT TO EXPECT

- Regular infusion therapy provided in our Day Surgery Unit
- Regular appointments and coordination of monitoring required from your prescribing specialist
- Access to a nurse navigator to support your through your journey
